AI ENGINEERING | MACHINE LEARNING | AUTOMATION | OPEN-SOURCE

Summary of Qualifications

Fourth-year Computer Science (Honours) student and former AI engineering intern experienced in agentic AI at TD SYNEX, machine-learning research at Ontario Tech's Trustworthy AI Lab, and open-source automation at Red Hat. Skilled in Python, Java, and modern ML tooling, with a record of leading projects end-to-end and collaborating across research and engineering teams. Trilingual: English, French, German.

Core Skills

- ✓ Project leadership & delivery
- ✓ Technical communication
- ✓ Cross-functional collaboration
- ✓ Problem-solving & debugging
- ✓ Research & experimentation
- ✓ Resourceful & adaptable

Technical Literacy

Languages: Java, Python, C++, JavaScript, HTML/CSS, SQL

ML & Data: TensorFlow, Keras, NumPy, Pandas, CNN training/evaluation

Tools & Systems: Linux, Ansible, Samba/NFS, shell scripting, Git/GitHub, Bitbucket

Certifications

- ✓ LPI Linux Essentials
- ✓ IBM Generative AI — Prompt Engineering, Introduction & Applications

Education

Ontario Tech University

Oshawa, ON

Bachelor of Science (Honours) — Computer Science

Sept 2023 – Jun 2027 (*Expected*)

- Relevant courses: Data Structures, Analysis and Design of Algorithms, Machine Learning, Mobile Devices.

Professional & Research Experience

TD SYNEX

Mississauga, ON

AI Engineering Intern

May 2026 – Aug 2026

- Led the Inventory Fulfillment project end-to-end, building a **NexChat** agent that lets salespeople enter a Customer Purchase Order ID and instantly receive fulfillment options and recommendations.
- Implemented the recommendation logic into the NexChat agent using **Python**, with **Bitbucket** for version control.
- Designed and executed the testing process, validating fulfillment recommendations before delivery.
- Coordinated the project as lead — running meetings, maintaining technical documentation, and keeping the team aligned through delivery.

Trustworthy AI Lab, Ontario Tech University

Oshawa, ON

Research Intern

Jul 2025 – Aug 2025

- Applied **Convolutional Neural Network** design and machine-learning principles to classify bloodstain patterns, raising accuracy above **80%**.
- Preprocessed and augmented imbalanced datasets with Python to improve generalization and reduce overfitting.
- Collaborated with graduate researchers to integrate results into a publication-ready pipeline.

Red Hat Inc.

Remote

Software Engineering Intern — Quarkus GitHub Bot

Jul 2021

- Developed a GitHub **automation** bot in **Java/Quarkus** that automated issue and pull-request triage workflows across the **Quarkus** ecosystem.
- Integrated auto-labeling and categorization to reduce manual triage time.

Community Involvement

Aproresco HackApro Hackathon (Bilingual)

Oshawa, ON

Organizer & Workshop Leader

Jan 2024 – Present

- Planned and executed a yearly hackathon for **60+ participants**, improving engagement with clear evaluation rubrics.
- Designed and led an interactive **Scratch** workshop, increasing beginner participation and confidence.
